- Update the **heatmap** as **new** reports are submitted

Volunteer Task Assigning

- Volunteers request or **accept tasks**
- Earn Achievement **Badges** for Successfully **Completed** Tasks

Software Design Approach

Object -Oriented Design Approach

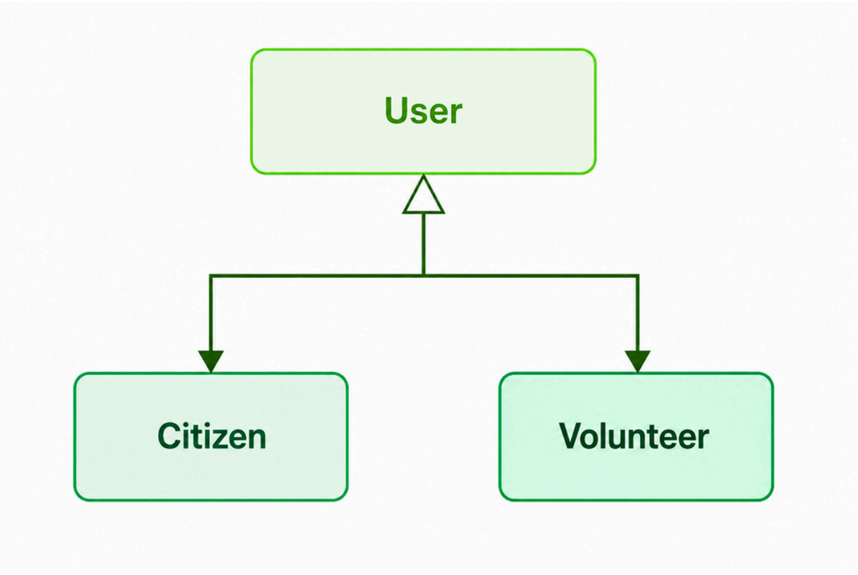

Why OOP

REPRESENTS REAL-WORLD ENTITIES NATURALLY

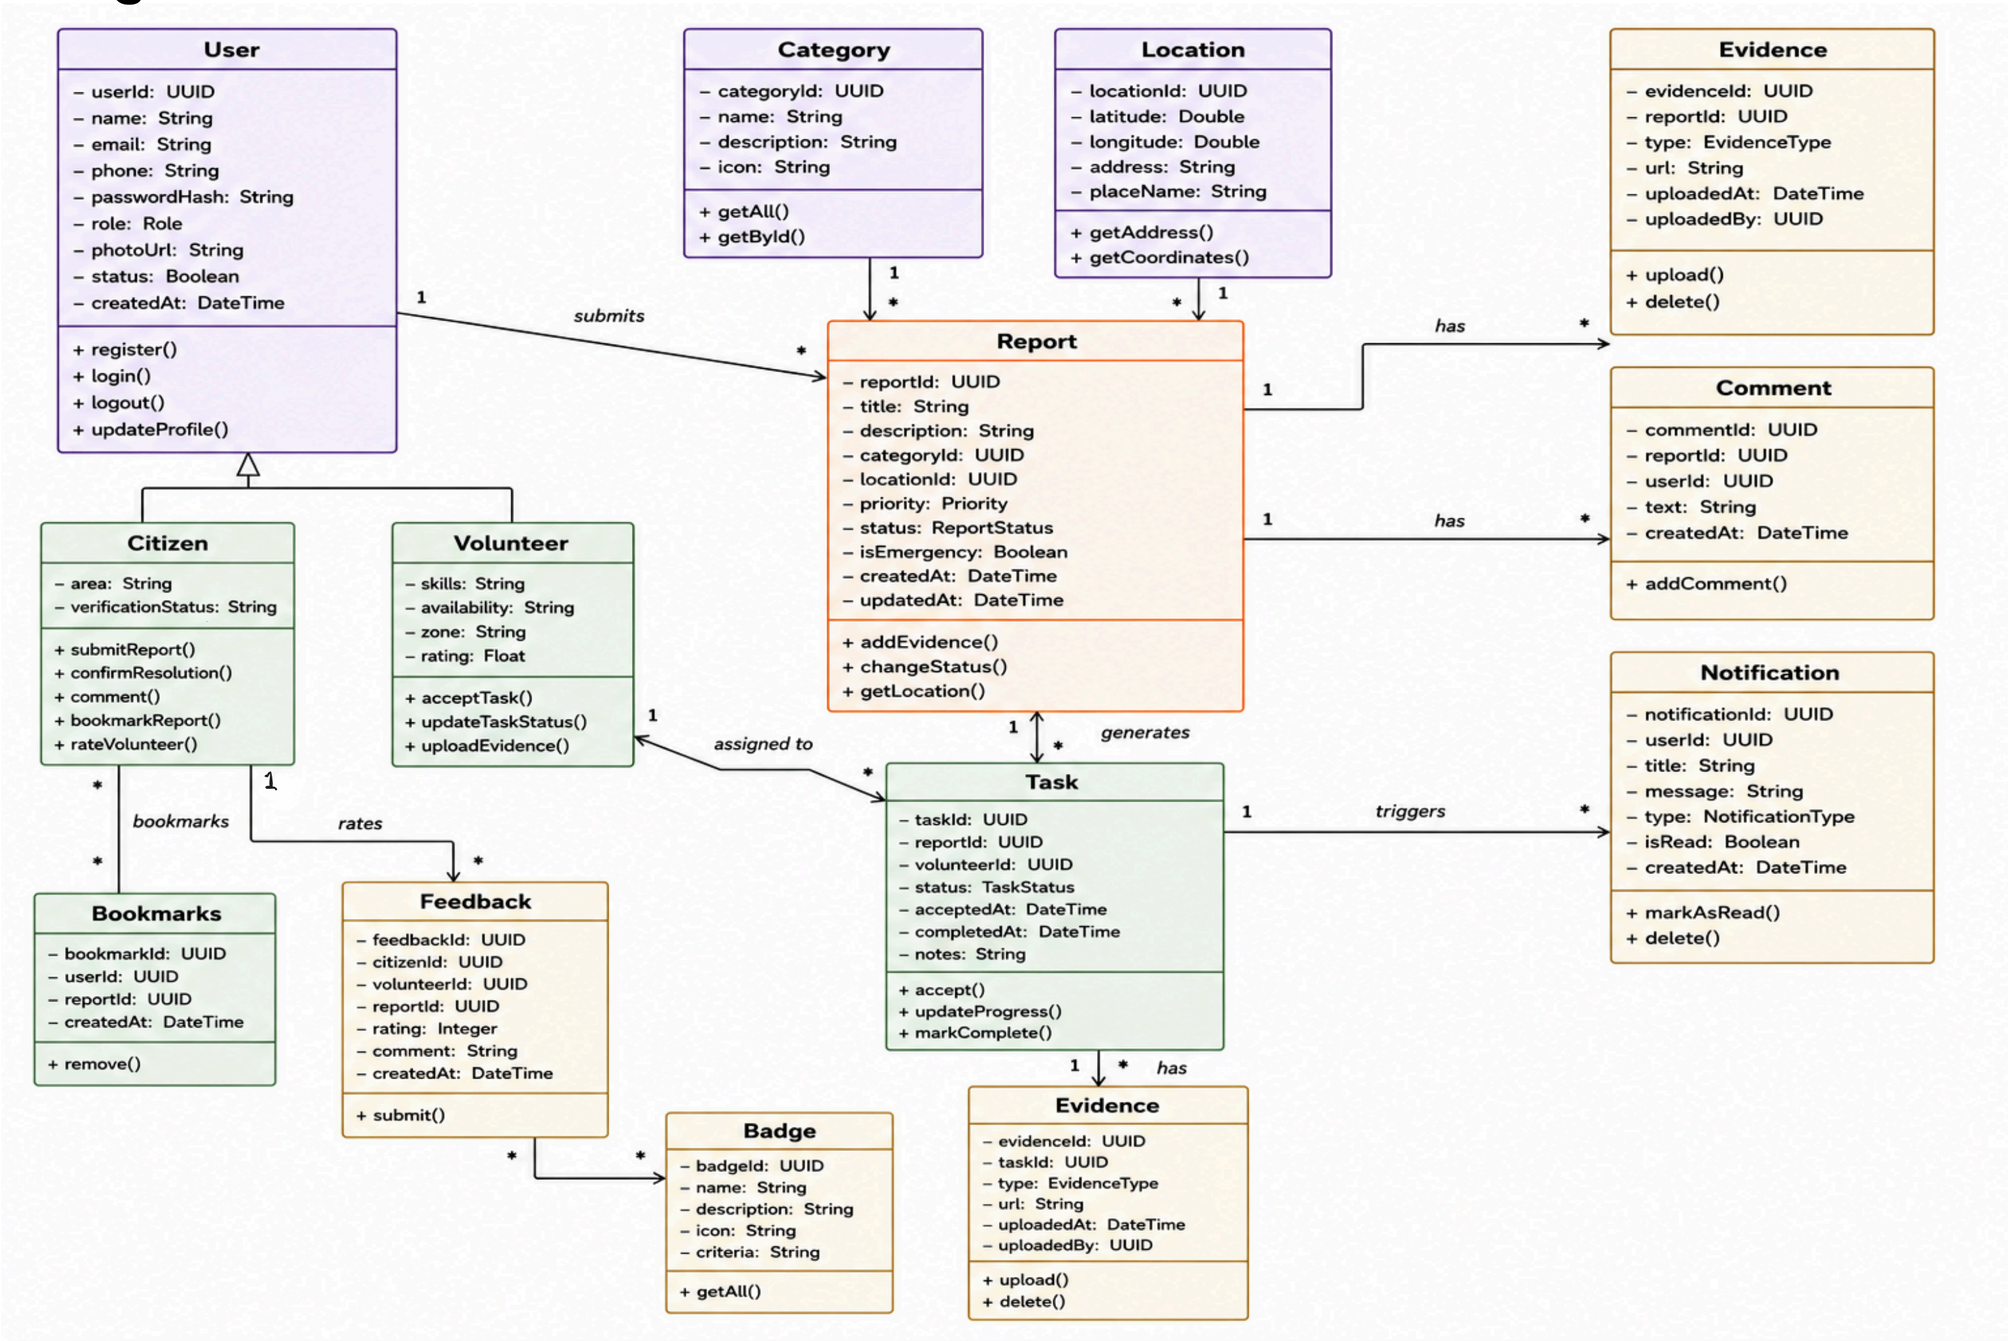

PROMOTES CODE REUSABILITY THROUGH INHERITANCE

IMPROVES MAINTAINABILITY

EASIER TO EXTEND WITH NEW FEATURES

UML Class Diagram

3-Tier Architecture

MODEL LAYER

REPRESENTS THE DOMAIN ENTITIES

BUSINESS LOGIC LAYER

APPLIES BUSINESS RULES

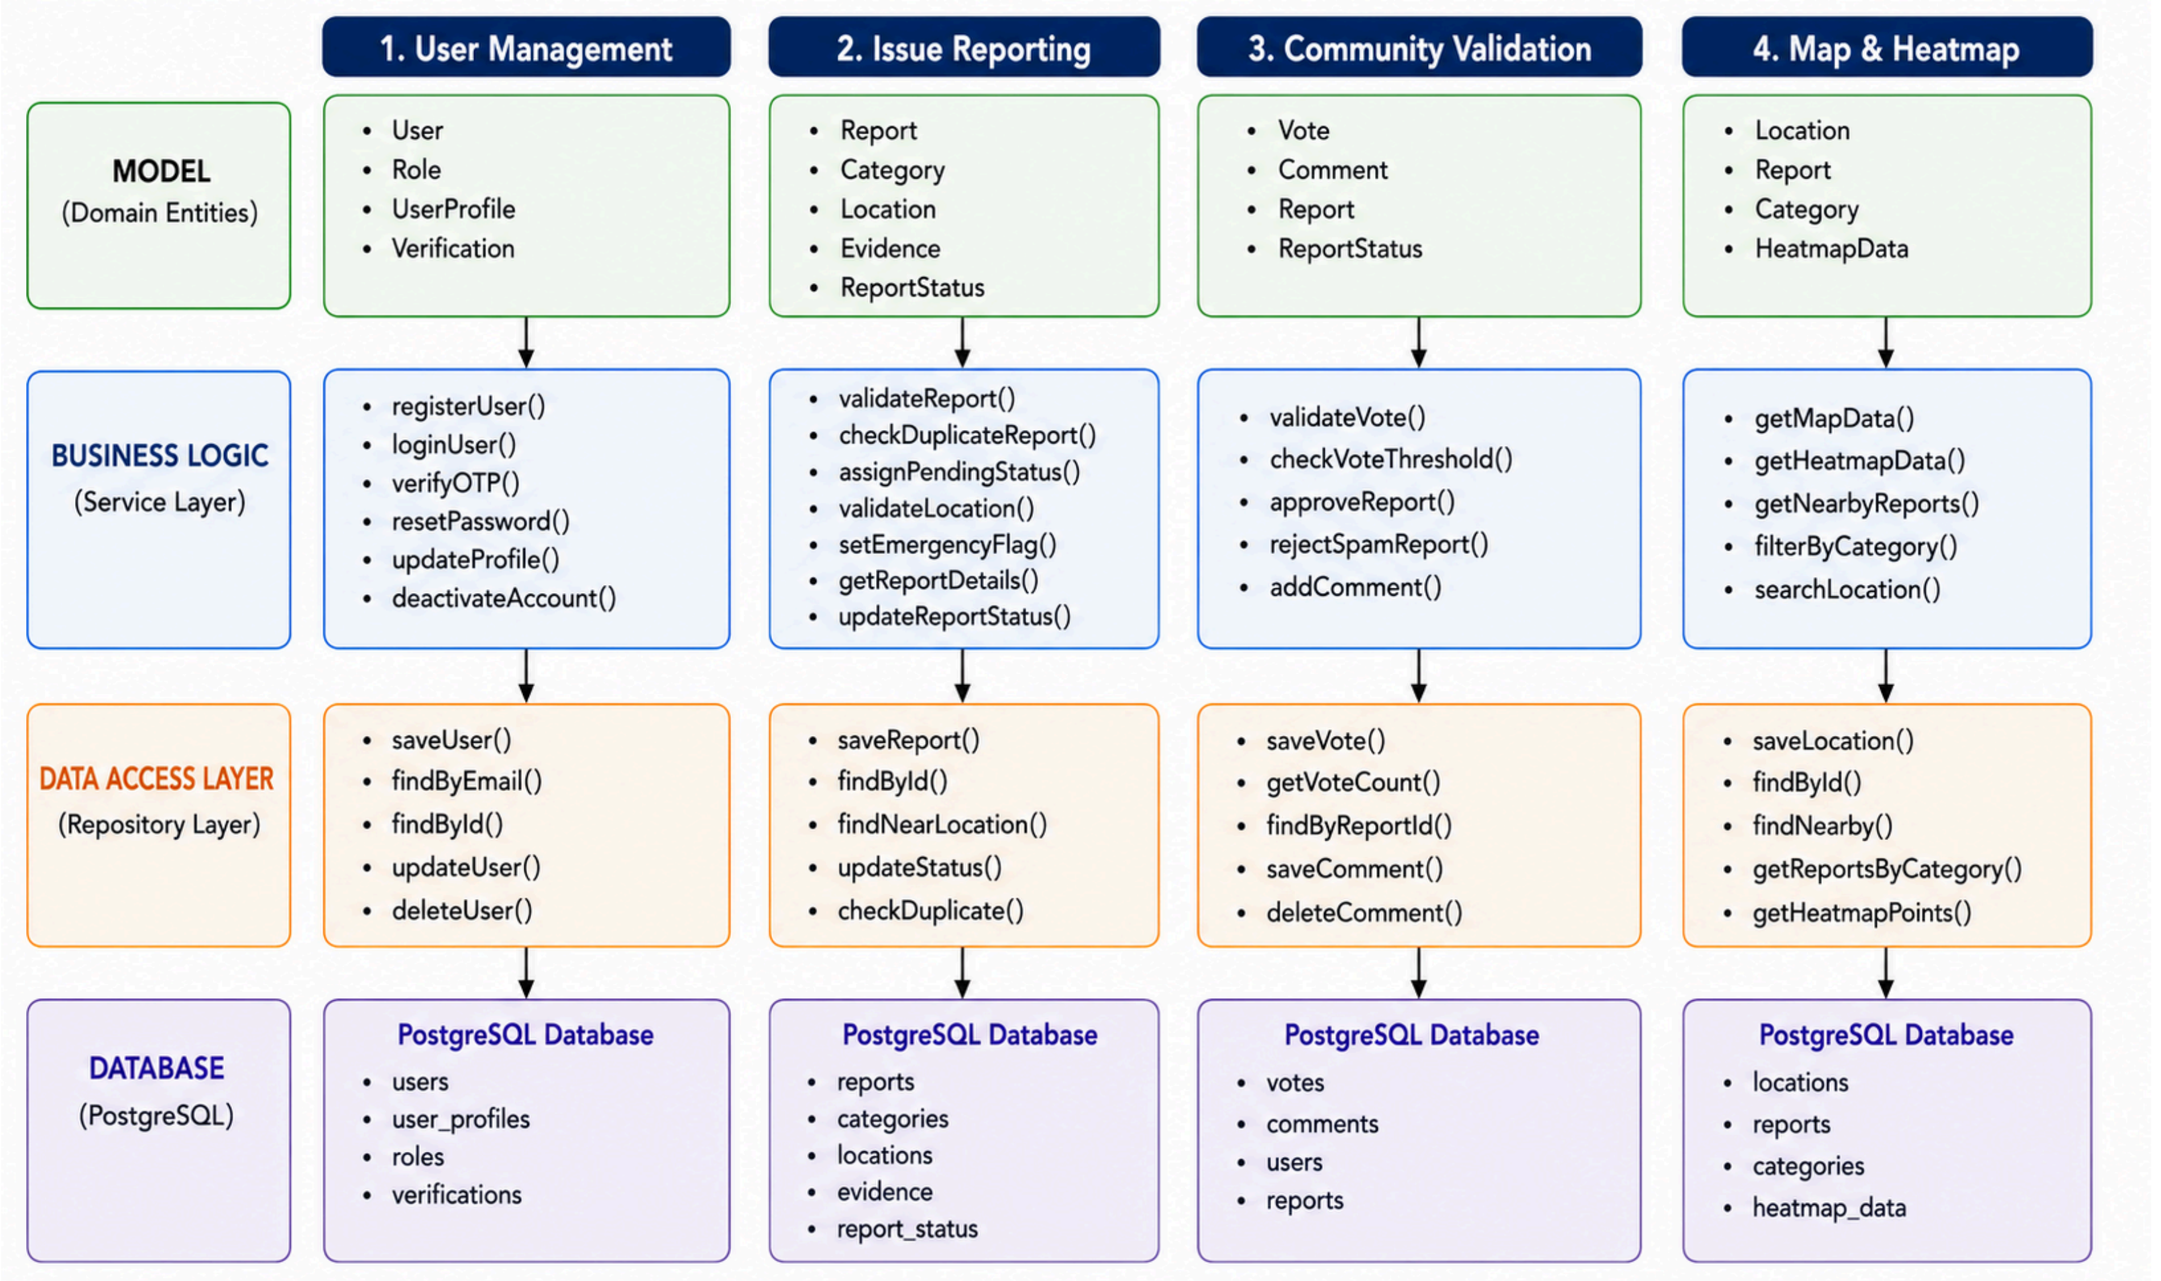

DATA ACCESS LAYER

Handles all database operations

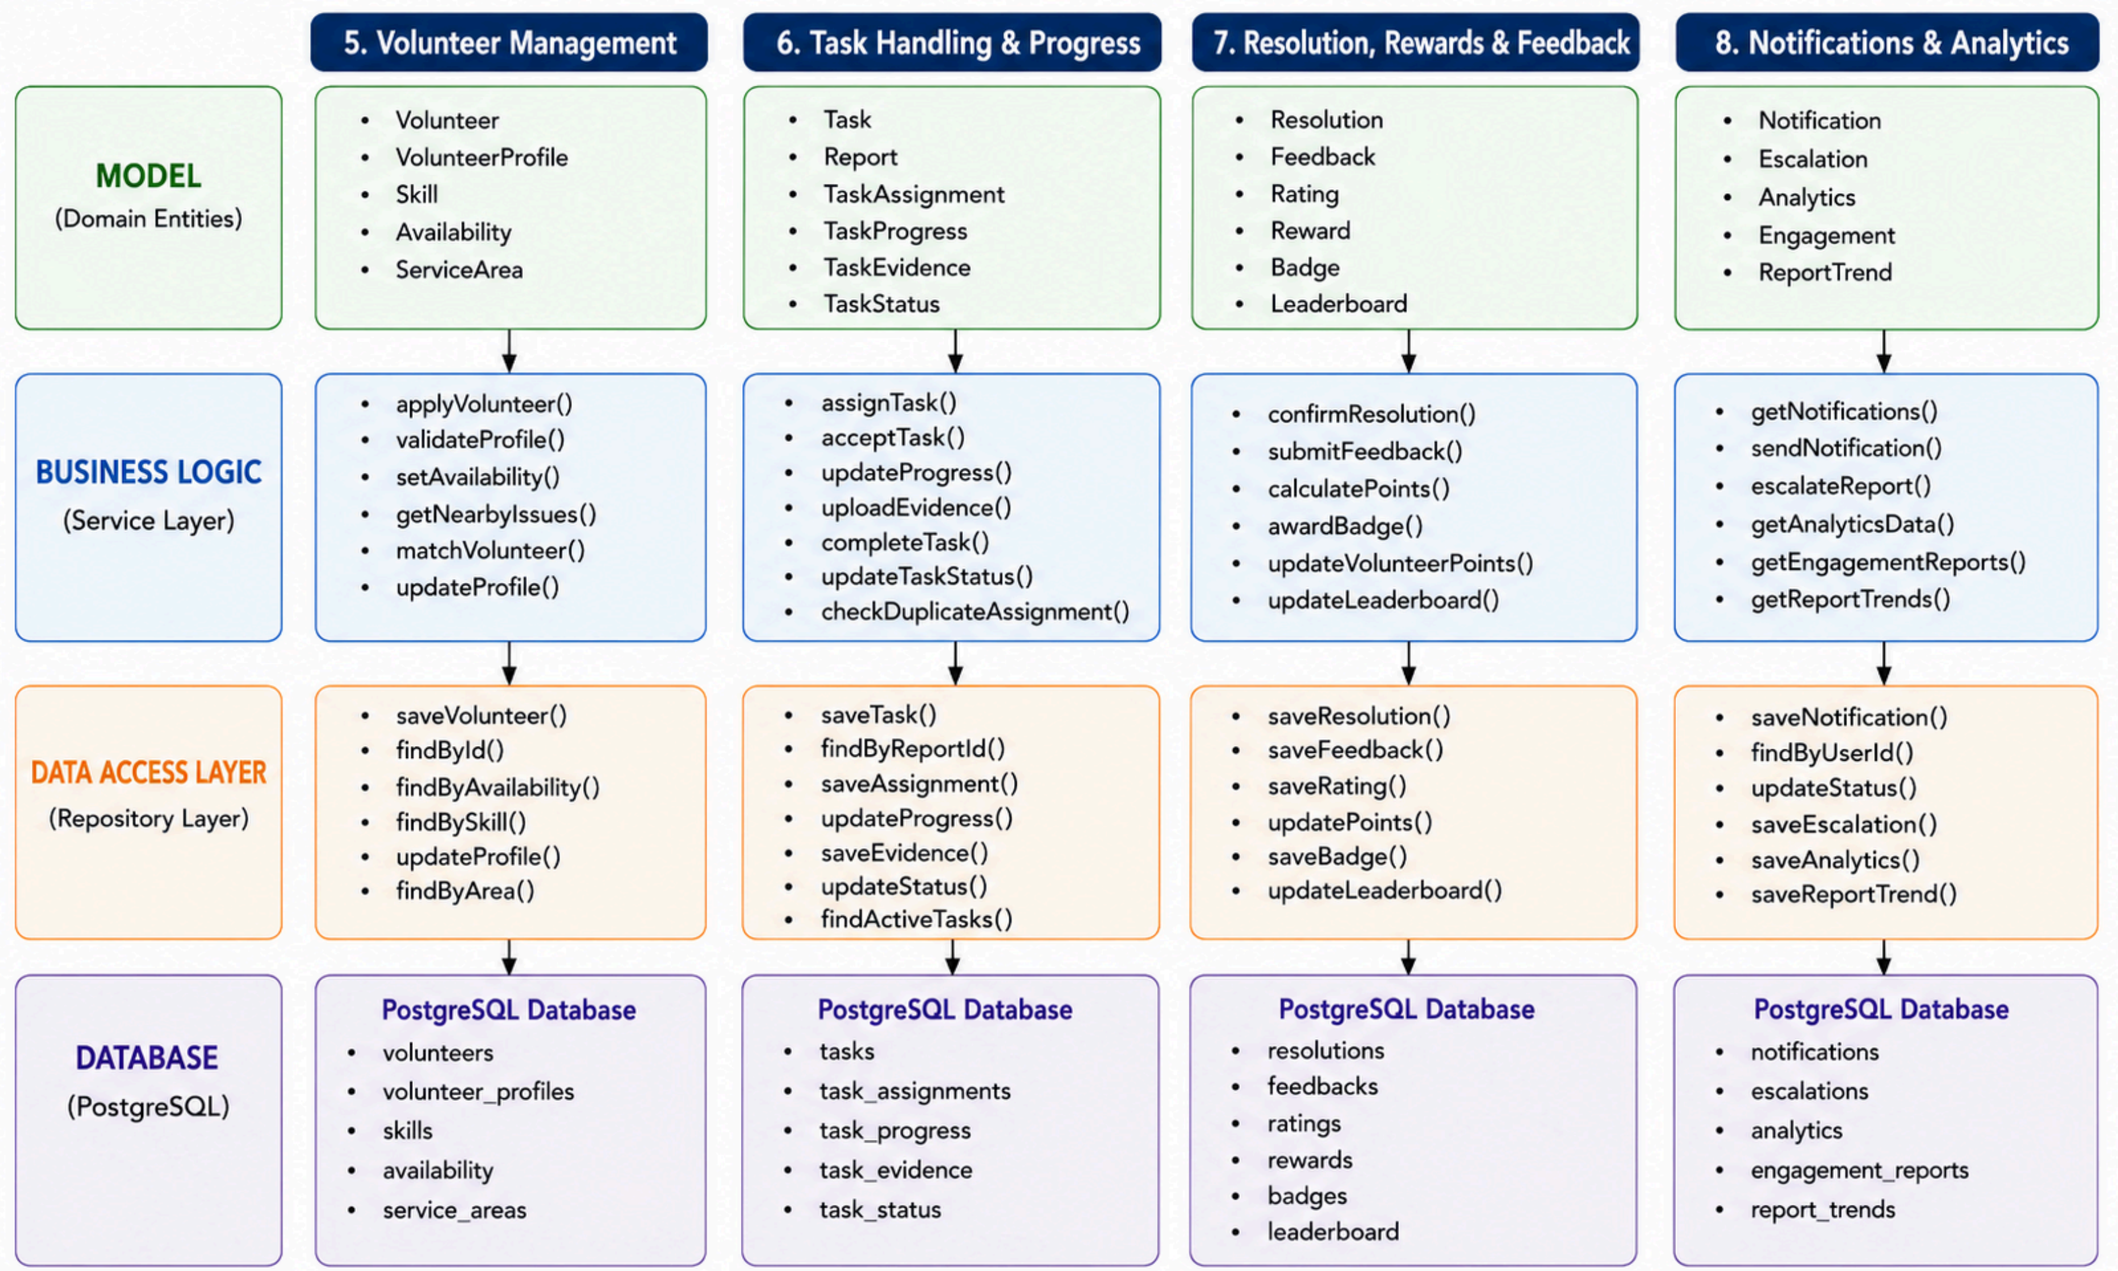

POSTGRESQL DATABASE

Stores all persistent system data.
